Education

University of Greenwich — **2025 – 2026**
MSc Computer Science — *London, UK*

Kingston University — **2021 – 2024**
BSc Computer Science — *Kingston upon Thames, UK*

Harrow College — **2019 – 2021**
BTEC Level 3 Extended Diploma in IT — *London, UK*

Newman Catholic College — **2016 – 2019**
6 GCSE's Including English and Mathematics — *London, UK*

Projects

Academimate | *Live Demo* | *GitHub* — **PHP / MySQL / JavaScript / MVC / Agile**

- Built a full-stack student housing and roommate matching platform as a **final year project**, serving real university students with live deployment
- Implemented **MVC architecture** with a secure **PHP** backend, **MySQL** relational database, and responsive HTML/CSS/JS frontend
- Led requirements gathering from real stakeholders, wireframing, and iterative prototyping using **Agile (Scrum & Kanban)**

Real Estate Manager | *GitHub* — **React Native / Expo / iOS / Android / Agile**

- Co-developed a cross-platform mobile app using **React Native** and **Expo** enabling landlords to manage property listings, tenants, and in-app communications on iOS and Android
- Implemented property photo uploads, in-app messaging, and live property status updates; used **Git & GitHub** for collaborative version control with **Agile** sprint delivery

Recipe Box E-commerce Platform | *Team Project* — **PHP / MySQL / HTML / CSS / JavaScript / MVC**

- Co-developed a responsive full-stack e-commerce platform for recipe box subscriptions, including user dashboards, subscription flows, and admin management tools
- Applied **MVC architecture** for a clean, scalable backend; collaborated in a team using **Agile** methodologies for iterative feature delivery

Bird Watcher Android App | *GitHub* — **Kotlin / Firebase / SQLite / Android**

- Android app in **Kotlin** with species tracking, photo capture, native geolocation, and **Recycler View** UI; integrated **Firebase** cloud sync with local **SQLite** for offline-first consistency

Grade Calculator — QA & Testing Project | *Team Project* — **Manual Testing / Test Cases / Bug Reports**

- Executed functional and performance test cases on a grade calculator system; identified and documented bugs and collaborated with developers on resolution
- Practiced test planning, input validation, and regression testing — demonstrating software quality assurance fundamentals

Work Experience

Catering Assistant / Patient Services — **Jan 2022 – Present**
Imperial College Healthcare NHS Trust (Part-time) — *Hammersmith, London, UK*

- Delivered patient food services across hospital wards, managing allergy-sensitive meal requirements with strict safety compliance
- Demonstrated consistent reliability and professionalism in a high-pressure, safety-critical NHS environment over **3+ years**
- Coordinated with multi-disciplinary ward staff, developing strong communication and teamwork skills under pressure

Housing Market Research Intern — **Sep 2019 – Oct 2019**
AN Estates — *Harrow, London, UK*

- Researched and recorded property lettings data in Excel; analyzed energy performance certificates (EPCs) using government resources

Certifications

AWS Educate: Introduction to Generative AI — Amazon Web Services — **Issued Mar 2025**

Technical Skills

Languages: Python, PHP, JavaScript, Kotlin, React Native, SQL, HTML5, CSS3, Java.

Frameworks & Libraries: React, Node.js, Express, React Native, Electron, Bootstrap

Databases: MySQL, SQLite, Firebase.

Tools & Platforms: Git, GitHub, Android Studio, VS Code, AWS, Agile/Scrum, Manual Testing.
